PROJECTS

03/10/2019 - 06/12/2019

Project Tor

https://sites.google.com/d/1WfD2k1UOdKXrxm1Dp1fY9D2uxmJJX8_l/p/18LdjwufmVzMvmIMqMTD5PHF8vv_lvZhD/edit

It is a computer program written in C language and it is a tracking program that can keep a large number of information of cars based on their registration number and when needed we could find information about those cars just by searching the number of the car. It is very user friendly and can take input or record without the requirement of rewriting the code. It will be very useful for keeping large number of data of cars specially in security purpose

02/01/2020 - 03/03/2020

BRT-Engine

The BRT-Engine is (JAVA based) important in documenting the information related to all the vehicles and management the documents. Purpose the BRT-Engine is to make the work of both BRTA(Bangladesh road transport authority) and the peoples make more easier and quicker. The BRT-Engine will give news about traffic ,rules and regulation of traffic and road safety, and also take information about vehicles, owner and also online registration is available. There are many options in the application and the application is user friendly. There is also report option added in the application for making any report for misconduct related to transport and road safety
